

In the claims:

For the Examiner's convenience, all pending claims are presented below with changes shown.

1-6. (Cancelled)

7. (Previously Presented) An apparatus comprising:

a rack-mount server enclosure having a front face;

a display device mounted on the front face movably coupled to the enclosure for multiple degrees of freedom of movement for the display device; and

an adjustable screw to lock the display device at one of a plurality of positions.

8. (Previously Presented) The apparatus of claim 7, wherein the adjustable screw is indexed to allow incremental adjustment of the coupled display device.

9. (Previously Presented) The apparatus of claim 7 wherein the display device comprises an LCD.

10-13. (Cancelled)

14. (Previously Presented) A rack mount appliance, comprising:

A front face;

a display device, having a back end movably attached to an enclosure, to partially embed the back end of the display device within the rack mount appliance and enable multiple degrees of freedom of movement of the display device; and

an adjustable screw to lock the display device at one of a plurality of positions.

15-17. (Cancelled)

18. (Previously Presented) A rack mount server having an integrated display device wherein an end of the display device is coupled to the rack mount server via a movable coupling, to provide multiple degrees of freedom of movement for the display device, and an adjustable screw to lock the display device at one of a plurality of positions.

19. (Previously Presented) The rack mount appliance of claim 14, wherein the display device may be viewed at multiple angles with adjustment of the display device via the adjustable screw.

20. (Previously Presented) The rack mount appliance of claim 14 wherein the adjustable screw is indexed to allow incremental adjustment of the display device.

21. (Previously Presented) The rack mount appliance of claim 14 wherein the display device comprises an LCD.

22. (Cancelled)

23. (Previously Presented) The rack mount server of claim 18 wherein the adjustable screw is indexed to allow incremental adjustment of the display device.

24. (Previously Presented) The rack mount server of claim 18 wherein the display device comprises an LCD.

25. (Previously Presented) The apparatus of claim 7 wherein the movable coupling is a ball and socket joint.

26. (Previously Presented) The rack mount appliance of claim 14 wherein the movable coupling is a ball and socket joint.

27. (Previously Presented) The rack mount server of claim 18 wherein the movable coupling is a ball and socket joint.
